SUMMARY

Full-stack developer with practical experience in React, Node.js, PostgreSQL, MongoDB and AI API integration. Built and deployed production applications with real users, custom domains, and third-party service integrations including OAuth, vector databases, and LLM APIs. Currently in final year of Information Technology Engineering at JSCOE. Looking for an internship where I can contribute to real product development from day one.

TECHNICAL SKILLS

Languages: C++, JavaScript, SQL

Frontend: React.js, Vite, React Router, Context API, Responsive UI

Backend: Node.js, Express.js, REST APIs, API Integration

Databases: PostgreSQL, Supabase, pgvector

Auth & Security: Supabase Auth, Google OAuth 2.0, JWT verification

AI & APIs: Claude API (Anthropic), OpenAI Embeddings API

DevOps: Git, GitHub, Vercel, Render, CI/CD

Tools: Postman, Claude Code

Core CS: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

SPPU Study Hub | sppustudyhub.in | *React.js, Node.js, Supabase PostgreSQL, Claude AI*

Mar 2026 – Present

- Built and launched a full-stack educational platform for SPPU engineering students, providing PYQs, notes, question banks, and AI-powered exam assistance in a unified portal.
- Developed an AI-based PYQ explainer using Claude API that generates exam-oriented answers following university-style formatting and answer-writing patterns.
- Implemented embedding-based semantic response caching, reducing repeated AI API requests by 65–70% and improving response efficiency under usage limits.
- Designed a scalable subject-wise content architecture with lazy loading and JSON-driven resource management, enabling efficient expansion across multiple branches and semesters.
- Launched the platform to 3,000+ visitors and 20,000+ page views within the first 18 days through organic student adoption, validating demand for centralized academic resources.

Farmsense AI | Live | GitHub | *React.js, Node.js, MongoDB, AI Integration*

Mar 2026 – May 2026

- Built an AI-powered responsive full stack agriculture platform to assist farmers with smart crop-related insights and recommendations.
- Connected Government of India Agmarknet API (data.gov.in) for live mandi prices with an AI-powered sell timing advisor.
- Integrated Claude Vision API for crop disease detection — farmers upload leaf photos and receive instant diagnosis, treatment steps, and organic solutions.
- Designed a farm dashboard with expense tracking, yield analytics, profit/loss calculation, and dynamic Recharts visualizations.
- Implemented real-time weather forecasting via OpenWeatherMap with AI-generated irrigation, spraying, and harvest recommendations based on actual forecast data.

Studentkart | Live | GitHub | *MongoDB, Express.js, React.js, Node.js*

Jan 2026 – Mar 2026

- Built a full-stack academic content platform using React.js and Node.js with structured Year - Subject - Unit navigation.
- Executed REST APIs with Express.js and MongoDB for CRUD operations.
- Added JWT-based authentication for users and admin roles.
- Created responsive UI using Tailwind CSS for mobile and desktop devices.

EDUCATION

Jayawantrao Sawant College Of Engineering

Bachelor of Engineering in Information Technology | CGPA: 8.1

Aug 2023 – June 2027

R. R. Shinde Junior College

HSC State Board | Percentage: 60.67%

June 2021 – Feb 2023

ACHIEVEMENTS

LeetCode: Solved 200 plus algorithmic problems covering arrays, linked lists, trees, graphs and dynamic programming.

Codolio: Solved 300+ problems across multiple platforms, improving problem-solving and coding speed.
